ILLUSTRATED PARTS CATALOGUE FOR

LIGHT SPORT AIRCRAFT

0. General

This Spare Parts Catalogue serves to allow order some selected spare parts from the aircraft manufacturer.

For parts order use Spare Parts Order form enclosed in this catalogue or in Appendices of the Aircraft Maintenance and Inspection Procedures (Maintenance Manual). State part description, order No., required quantity and other information required in this form.

If you require other parts then is mentioned in this catalogue, do not hesitate contact us.

0.2 Overview

SportStar is a high performance Light Sport Aircraft. It is the very first aircraft on the market which has received the US FAA Special Airworthiness Certificate in the S-LSA category.

Top production quality and reliability of the airplane is based on the Evektor's EASA certified aircraft production which is further supported also by ISO 9001 certification. Outstanding flight characteristics with precise handling and positive controls, excellent production workmanship together with benefits of durable all metal airframe makes the SportStar worldwide popular sport/leisure flying and pilot training airplane.

0.3 Aircraft descriptions

Airframe

The SportStar has a top quality and durable all metal anodised and corrosion-proofed aluminum airframe with prolonged service life. Airframe joints are riveted and as well as bonded/glued for a longer airframe life-time, smoother and quiet flight and also for better protection in accidents (no unzipping). All heads of rivets are filled with mastic for excellent look of aircraft surface.

Fuselage

The fuselage has a semi-monocoque construction formed with reinforcements and duralumin covers. The tail fin is an integral part of the fuselage. The engine section in the nose is separated from the crew by a firewall, which the engine bed is attached to.

Wing

The rectangular wing is a monospar construction with an auxiliary spar for the ailerons and flaps attachments. All the elements are riveted together. At the ends of the wings are riveted fiberglass wing tips.

Tail unit

All-metal tail unit consists of the horizontal tail unit with stabilizer and elevator with a trim tab, and trapezoidal shaped vertical tail unit with rudder.

Power plant

The SportStar is equipped with four-cylinder, four-stroke horizontally opposed, OHV distribution Rotax engine – legendary for its reliability and smooth operation. Engine cooling is combined, the cylinder heads are liquid cooled, and the cylinders are air-cooled. Dry sump forced lubrication, two spark electronic ignition. The engine is equipped with an electric starter, an AC generator and a mechanic fuel pump. Integrated reducer with a reduction ratio of 2.273 drives the propeller.

The standard aircraft has installed Rotax 912 UL with 80 hp. The 100 hp Rotax 912 ULS with TBO 1500 hrs or alternative power units can be installed on request.

Engine type	ROTAX 912 (UL)	ROTAX 912S (ULS)
Engine manufacturer	Bombardier-Rotax GmbH	
Takeoff power	59.6 kW / 80 hp at 5800 RPM max. 5 min.	73.5 kw / 100 hp at 5800 RPM max. 5 min.
Max continuous power	58 kW / 78 hp at 5500 RPM	69 kW / 93,8 hp at 5500 RPM
Cruising power	53 kW / 71 hp at 4800 RPM	53 kW / 71 hp at 4800 RPM
Max takeoff RPM	5800 RPM, max. 5 min.	
Max continuous RPM	5500 RPM	
Cruising RPM	4800 RPM	
Idle RPM	1400 RPM	

Propeller

The SportStar is standard-equipped with the Klassic 170/3/R propeller. It is a on ground adjustable composite three-blade propeller. The propeller is attached by 6 bolts to the propeller hub and is fitted with a fiberglass propeller spinner. Alternative adjustable propellers can be installed on request.

Fuel System

Fuel system consists of two wing integral tanks in total amount of 118 liters (31,2 USgal), a fuel cock, a filter and a fuel pump on the engine. Each tank has a sump and drain valve. The fuel tank venting outlet is under the wing tips.

Landing gear

The three-wheel landing gear with the controllable nose wheel is used. The main landing gear legs are manufactured from composite materials and are firmly attached to the fuselage. Main wheels are provided with the hydraulic disk brakes which are controlled by foot control pedals. The nose wheel is controlled by means of pull-rods coupled with foot control pedals and its steel undercarriage leg is spring-loaded by rubber ligaments.

Cockpit

Comfortable and luxurious cockpit with two ergonomically shaped side-by-side seats, fantastic all-round visibility, adjustable pedals, perfect ventilation and optional heating system makes flying with SportStar enjoyable even on long distances.

The canopy consists of a steel frame on which the organic glass canopy is bolted.

The front part of canopy is forward detachable, the rear part is fixed. For easier and effortless manipulation, the weight of the canopy is counterbalanced by two gas struts. The canopy is equipped with handles and lock. Canopy of two different widths as well as tinted canopy is available.

Cockpit floor is covered with a removable carpet, seats have light upholstery and fuselage sides are covered with upholstered panels with pockets.

Baggage compartment

Behind the backrests located baggage compartment is designed for maximum 25 kg (55 lbs) loading.

Control

The SportStar is equipped with a classic dual control system. The ailerons and elevator are controlled by sticks, the rudder is controlled by pedals. The flaps are controlled mechanically, the flaps control lever is located between the seats as well as trim tab lever.

Technical data

Dimensions		
Length	19 ft 7½ in	5,98 m
Height	7 ft 8 in	2,33 m
Wing span	28 ft 5 in	8,65 m
Cabin width	46 1/2 in	1.18 m
Baggage compartment volume	6,2 ft³	175 l

Weight & Quantities		
Empty weight	668 lb	303 kg
MTOW	1268 lb	575 kg
Useful load	600 lb	272 kg
Design load factors	+6g/-3g	
Max. baggage	55 lb	25 kg
Wing fuel tank capacity	31,2 Usgal	118 l

Flight Performance		
Never exceed airspeed	146 KIAS	270 km/h
Maximum level airspeed	115 KCAS	213 km/h
Cruise at 75%	110 KCAS	204 km/h
Stall speed no flaps	45 KCAS	83 km/h
Stall speed with flaps	40 KCAS	74 km/h
Rate of climb	859 ft/min	4,4 m/s
Service ceiling	13100 ft	4000 m
Take-off run	620 ft	190 m
Landing run	590 ft	180 m
Total range	700 NM	1300 km
Total endurance	8.5 hr	

0.4 Catalogue description

The Spare Parts Catalogue lists items of spare parts composing **SportStar** plane. Items forming the plane are grouped into section composed of groups formed by one or more sheets.

- 1 FUSELAGE
- 2 WING
- 3 TAIL UNITS
- 4 CONTROLS
- 5 LANDING GEAR
- 6 POWER UNIT
- 7 INSTALLATIONS
- 8 COCKPIT EQUIPMENT
- 9 OPTIONAL EQUIPMENT

The group name, drawing number and name are showed at the top.

Parts without item number are shown for better orientation only.

For repairs use original spare parts Evector-Aerotechnik only.

Intentionally left blank
