**Learn to Fly at AvSport of Lock Haven**

353 Proctor St., Hangar One fly@AvSport.org
Piper Memorial Airport http://AvSport.org
Lock Haven PA ofc/fax (570) 748-3725
17745 USA cellphone (570) 419-1229

Revised 6 January 2018
1. AvSport Overview

Touch The Sky
At AvSport of Lock Haven, your Sport Flying Headquarters on the Piper Memorial Airport

AvSport of Lock Haven is a full service FAR Part 81 flight school registered with the TSB as an approved alien flight student program participant.

As an FAA Safety Team approved training provider, AvSport of Lock Haven offers courses, seminars, and webinars providing winds and AMT award credit.

Done fly our Redbird Jay flight simulator. Enjoy unlimited use with our affordable annual and life simulator club memberships.

AvSport is proud to be one of the first flight schools in the country to offer commercial drone operator training.

Call (570) 748-3725, or visit us on the north side of the airport

2. Vision and Mission Statements

**Our Vision:**
AvSport envisions a General Aviation renaissance, facilitated by quality training of Sport Pilots and the availability of modern Light Sport Aircraft.

**Our Mission:**
AvSport enhances aviation safety and enjoyment, by offering:

- a rigorous, though flexible, flight training curriculum
- experienced, professional Certified Flight Instructors
- well maintained advanced Light Sport Aircraft
- modern and accessible instructional materials
- individualized instruction
- an affordable aviation experience
3. Facilities

The General Aviation Terminal, located in Hangar One at the Piper Memorial Airport (KLHV) in scenic Central PA, houses our flight school office, restrooms, conference room, weather briefing room, flight simulator, and pilot’s lounge. Ideally suited to Sport Pilot training, Lock Haven is a non-towered general aviation airport with a 3800 by 75 foot paved runway, and a parallel 2200 by 100 foot turf strip. The paved runway is equipped with pilot controlled lighting for night operations, as well as runway end identifier lights and a two-light visual approach slope indicator at each end. Aircraft storage and maintenance activities are housed in T-hangar North 7, directly across the parking lot from the Pilot's Lounge. A camping trailer on the field is available for the use of students from outside the local area wishing to stay overnight. A nearby B&B also offers visitors pleasant accommodations with a flight school discount.
4. Aircraft

Available for both flight instruction and rental by qualified pilots, AvSport of Lock Haven provides modern, well equipped Light Sport aircraft, manufactured to exacting ASTM International standards. Our current primary trainer is an Evektor SportStar Max (our second of this make and model) purchased in July 2015. Manufactured in the Czech Republic, it is licensed by the Federal Aviation Administration as a Special Light Sport Aircraft (S-LSA), and equipped with the latest “dual glass cockpit” redundant electronic flight and engine instruments. Its advanced avionics package and fully coupled autopilot make this aircraft suitable not just for Sport Pilot training, but for our more advanced students, including Private and Instrument Pilot candidates. During 2017, AvSport further increased safety by upgrading our transponder to year 2020 requirements, and implementing full ADS-B In and Out capability, satisfying upcoming FAA NextGen radar requirements. We expect our rigorous preventive maintenance and inspection program to provide optimum engine operation through the factory-authorized maximum of 2000 flight hours.
5. Drone Pilot Training

Commercial operation of Unmanned Aircraft Systems (commonly called Drones) has emerged just recently as a major growth segment of the aviation industry. In late June of 2016, the Federal Aviation Administration published rules for licensing of commercial drone pilots, a process which began on 29 August. AvSport immediately began developing curriculum, and the week the new rules went into effect, became the first flight school in the nation to train and graduate Remote Pilots with a Small Unmanned Aircraft System rating.

According to FAA Administrator Michael Huerta, the new FAA rating is expected to generate more than $82 Billion in economic activity, and generate over 100,000 new jobs, over the next ten years. "Whereas the early 20th Century ushered in the Air Age," notes Prof. H. Paul Shuch, the flight school’s founder and Chief Flight Instructor, "and the mid 20th Century represented the start of the Space Age, one could call the early 21st Century the beginning of the Drone Age. The unmanned aerial systems industry is currently in its infancy, with commercial interests just beginning to discover the wealth of applications which can be fulfilled with these small, inexpensive, and very capable remotely piloted vehicles."

To date, AvSport has graduated commercial drone pilots who have used their Unmanned Aircraft Systems for law enforcement, accident investigation, commercial photography, research and development, and site surveys in support of broadband wireless telecommunications.

Anthony Foxx, former U.S. Secretary of Transportation, said “we are part of a new era in aviation, and the potential for unmanned aircraft will make it safer and easier to do certain jobs, gather information, and deploy disaster relief.” The FAA states “the rule’s provisions are designed to minimize risks to other aircraft and people and property on the ground.”

AvSport is proud to offer potential commercial drone operators an opportunity to get involved on the ground floor of what promises to be aviation's next Great Frontier. Our quarterly Remote Pilot courses are now scheduled through the end of the 2018 calendar year.
6. Curriculum

Developed by a retired college professor with 45 years of experience in higher education, AvSport’s rigorous though flexible flight training curriculum allows students to obtain the new Sport Pilot license in half the time, and at half the cost, of the traditional Private Pilot rating, without compromising skills or safety. Students can choose between an accelerated five-week training program, and a less intensive program of conveniently scheduled lessons. We are an FAR Part 61 flight school and TSA-approved Alien Flight Student Program provider, nominated by our students for the AOPA Flight Training Excellence Award. Flight training and individualized ground instruction are integrated, and are supplemented by reading assignments, practice tests, and online PowerPoint lessons to allow each student to progress at his or her own pace.

To date, more than 80% of AvSport’s students accomplishing their first solo flight have gone on to become licensed pilots, half of our graduates are now aircraft owners, and 25% of our licensed Sport Pilot have continued their studies, earning their Private Pilot ratings.

AvSport’s ten standard training packages now include:

- “Taste of Freedom,” a half-hour Discovery Flight
- “Gateway to the Sky” Introductory Lesson (one hour each of flight and ground training)
- “Simulator Club,” unlimited use of our Redbird Jay flight simulator for a flat annual fee
- “Flight FUNdamentals,” a four-lesson, minimal-commitment sport flying experience
- “Five Weeks, Rain or Shine,” zero hours to solo flight in an intensive pre-solo module
- “Five More Weeks of Heaven,” first solo to license in an intensive post-solo module
- “Airspace Ace.” Earn all 3 Sport Pilot controlled airspace endorsements in just 4 days
- “Pilot Downsizer,” a 4-day Light Sport Aircraft transition for licensed Private Pilots
- “The Next Step Up,” a 5-week Private Pilot add-on module for licensed Sport Pilots
- “Remote Pilot In Command,” a 3-day Commercial Drone Operator certification course
7. Students

During 2017, one new AvSport student accomplished his first solo flight, and two completed training for, and obtained, their Sport Pilot certificates. Our instructors conducted 7 Introductory Lessons. One of our Sport Pilot graduates completed his Private Pilot upgrade, and we gave 4 licensed pilots their 24-month flight reviews. Our students, who range in age from 16 to 80, have come to Lock Haven for training from as far away as New York, Connecticut, New Jersey, Ohio, Maryland, Massachusetts, Georgia, California, Florida, Canada, Saudi Arabia, India, Denmark, and Sweden. They represent a wide range of professional and educational backgrounds.

As students graduate from our Sport Pilot training program, many have chosen to become renter pilots, who continue to enjoy the recreational use of our aircraft. Others have continued on to earn higher ratings, and exercise additional pilot privileges, and several have bought their own airplanes, or joined flying partnerships.

AvSport promotes a sense of community among our students, instructors, prospects, and graduates, by sponsoring Safety Seminars, graduation parties, and (sadly) memorial gatherings, as well as hosting movie nights complete with popcorn and aviation films, and monthly Hangar Flying sessions featuring coffee, donuts, education, singing, conversation, and fellowship. Though run as a viable business entity, AvSport strives to foster an old-time flying club atmosphere.
Early in 2017 AvSport conducted its annual TSA-mandated Security Awareness Training course for eight area flight instructors. AvSport remains a TSA-approved Alien Flight Student Provider, subject to periodic audits conducted by both the Department of Homeland Security and the Pennsylvania Department of Transportation’s division of aeronautics. In his capacity as the volunteer FAA Safety Team Lead Representative for Lock Haven, in 2017 our Chief Flight Instructor offered ten free safety seminars in Lock Haven PA, Baltimore MD, and Sebring FL, and six nationwide presentations through his EAA Webinar series. Overall, our small staff boasts over 100 years of combined aviation experience.
9. Events

The premiere aviation event at Piper Memorial Airport is the annual Sentimental Journey to Cub Haven fly-in. Each summer, AvSport participates by providing Discovery Flights, safety seminars, and aircraft for static display. Here, our first SportStar trainer attracts the attention of some of our Amish neighbors.

AvSport students, instructors, graduates, and friends gather in the pilot's lounge, Hangar One at KLHV, once each month for free coffee, doughnuts, and hangar flying.
10. Maintenance

In 2017, AvSport continued to upgrade its modern, fully equipped maintenance shop in T-hangar 7 North at Piper Memorial Airport, conveniently located directly across the parking lot from the Pilot's Lounge and our flight school office in Hangar One. We perform condition inspections, preventive maintenance, major and minor repairs, and alterations to our own fleet, as well as customers’ Special and Experimental Light Sport Aircraft. We are the sole Rotax Engines designated Independent Repair Centre for Western PA. During the year, our Director of Maintenance renewed his Rotax service, maintenance, and heavy maintenance certificates, and remains rated by the FAA to perform inspections on Light Sport Airplanes, Powered Parachutes, Gliders, and Weight Shift Control Aircraft.
11. Financials

Sport flying being a recreational activity, AvSport’s financial position is both highly seasonal, and dependent upon the local community’s aggregate discretionary income. Because of marginal weather leading to fewer flight hours, our 2017 revenues decreased slightly, as compared to the previous year. However, our operating expenses also decreased, due to a reduction in ongoing aircraft maintenance costs resulting from decreased flight hours. AvSport continues to generate a modest positive return on investment, making 2017 our second most profitable year. We have succeeded in generating a positive return on investment in seven out of our eight years of operation. The charts below detail our operating revenues and expenses for the year just ended, exclusive of amortization of capital investment.

2017 Revenues

12. Congratulations!

To David Mauck (left) and Rajendra Dave (right), who in April earned their Sport Pilot certificates with FAA Designated Pilot Examiner John Smith (center).

...and again to Rajendra Dave, who then went on to earn his Private Pilot rating in his own plane, with examiner Todd Aungst.
AvSport congratulates student pilot William Knauth, who flew his first solo flight in October, after having won the Flying Musicians Association Solo Scholarship (and on passing his Sport Pilot knowledge test immediately afterward).

We also congratulate student pilot George Snedeker on his acquisition of this beautiful Jabiru 3300 powered Zenith 601XL, now housed in Hangar One at Lock Haven, awaiting warmer weather...

... as well as student pilot Mark Smart, who also purchased a Zenith 601 (this one Corvair powered), and is in the process of installing a new engine. He hopes to begin flying it in the Spring.
13. In Memoriam

Dennis Scalise
March 5th, 1950 - July 11th, 2017
Remembered by H. Paul Shuch

Dennis Scalise came to AvSport for flight training two years ago, and he very quickly became far more than just a student. As I got to know him, I realized that Denny and I shared a wide variety of interests, including electronic reconnaissance, education, computers, classic automobiles, and, of course, aviation.

I knew from the start that Denny was fighting a potentially serious medical condition, but he wanted to fly as long as his health permitted, and I was honored to help him check off what (sadly) turned out to be a bucket list item. Katie Garvin, Denny's wife of 41 years, encouraged his passion for aviation, often accompanying him to the airport for his flight lessons.

After graduating from High School in Riverside New Jersey in 1968, Denny enlisted in the United States Navy. He served there as a communications technician from 1968 until 1972 in Adak Alaska, San Miguel Philippines, and Winter Harbor, Maine. Denny was in charge of the Data Analyzing Department at Fort Apache, Philippines and received A Meritorious Citation for Intelligence Surveillance and Communication during the Vietnam War.

After four and half years of military service, Denny moved to State College, PA, where he was employed as a Computer Systems Analyst by HRB Singer (Raytheon) until 1998. Thereafter, until his retirement in 2011, he worked at Stanford Research Institute (SRI) in State College. He was a dedicated professional and was awarded a Letter of Commendation from the National Reconnaissance Office (NRO) in 2005 for his work during the Cold War on the Poppy Electronic Satellite Reconnaissance Program, commonly known as the Siss Zulu Operation.
An engineer at heart, Denny was always eager to acquire new skills and knowledge. The photo below shows him helping me to service a Rotax engine. He always envisioned himself as far more than just an airplane driver. You can see from his expression in the photo that he took his work very seriously.

Denny's illness progressed to the point that, six months into his pilot training, he chose to ground himself. Ever generous, he donated the balance of his flight school account credit to a fellow student who was lacking in financial resources. He also contributed, anonymously, to a flight training scholarship program. (He would not have wanted me to tell you this, which further testifies to Denny's generosity and humility.)

Denny and I stayed in touch, on and off, for the following year. When his condition became terminal, and I told Denny I wanted to visit with him, he demurred, saying he wanted me to remember him not as he was now, but as he had been during healthier times. And, I always shall.

15. Four Quadrant Briefing Charts:

**Sport Pilot Flight Training Curriculum Development**

**Schedule Milestone and Accomplishments:**
- September 2018: Development and implementation of the curriculum.
- December 2019: Introduction of flight training programs.
- June 2020: Update of curriculum to include new technology.
- April 2021: Introduction of new flight training systems.

**Keywords:** Flight Instruction, General Aviation, Flight School, Sport Pilot, Light Sport Aircraft, ASA, ASTM, FAA

**Remote Pilot Training Curriculum Development**

**Schedule Milestone and Accomplishments:**
- July 2017: Course curriculum development complete.
- August 2018: First flight training course launched.
- April 2019: Introduction of new technology in training.
- September 2020: Certification of first Remote Pilot graduates.

**Keywords:** Remote Pilot, Unmanned Aircraft Systems, Remotely Piloted Vehicles, Flight Training, Drone Safety
